Source: Urban Institute and Kaiser Commission on Medicaid and the Uninsured estimates based on data from the Centers for Medicare and Medicaid Services - form 64 reports (March 2009); and Center for Children and Families analysis using fiscal year 2007 Federal Medical Assistance Percentages published in the Federal Register, 71: 28041-28042 (May 15, 2006);

Note: Expenditures include benefit payments and disproportionate share hospital payments; they do not include administrative costs, accounting adjustments, or spending in territories. The federal government picks up, on average, about 57% of total Medicaid payments; this is reflected in the total amount federal and states shares for the United States.
