Source: Georgetown University Center for Children and Families analysis of estimates from the US Census Bureau's 2011 American Community Survey.

Notes:

The number estimates and percentages above are based on the population for whom poverty status could be determined by the Census Bureau. Therefore, the population totals are slightly smaller and estimates may differ slightly from the estimates published in "Uninsured Children 2009 - 2011: Charting the Nation's Progress." Sources of coverage are not mutually exclusive, a person may have more than one type.

"Children" are under the age of 18 and "low-income" is defined as under 200% of the Federal Poverty Level.
