Notes: Eligible parents are aged 19-64 with income below 133% FPL (plus a five percentage point disregard) who are citizens or immigrants with more than five years of US residency. Documentation status is imputed for non-citizens. Estimates reflect an adjustment for misreporting of coverage on the ACS. Due to rounding, percentages in a category may not add to 100 percent.

\* Indicates that the standard error is greater than 30 percent of the estimate and should be interpreted with caution.

1. Of the 4.91 million uninsured parents potentially eligible for Medicaid under the ACA, an estimated 190,000 uninsured parents do not have a child who is enrolled in Medicaid/CHIP or eligible for Medicaid/CHIP but uninsured. Most of these parents have a child with private coverage.

2. Due to the exclusion of groups with small numbers of observations, the ethnicity/race category does not sum to 100 percent.

3. Due to the exclusion of groups with small numbers of observations, the language spoken at home category does not sum to 100 percent.

--- Indicates no observations in that category.
