

# CELEBRATE WHAT YOUR CHILD CAN DO AND PLAN FOR EACH NEXT STEP

From birth, all children reach milestones in how they play, learn, speak, act, move and interact with others. These milestones are linked to their ability to succeed in kindergarten and in life.

CountyCare's resources help you enjoy your child's strengths and identify if they may need more support.

We make sure your child is reaching his or her milestones and is ready for kindergarten by:

- Providing a series of **free screenings, including developmental screenings**, at important moments in your child's early years.
- Connecting you with **services and support** like Early Intervention if you and your doctor see there is a delay in your child's development. Getting help early makes a big difference!

**85%**  
of a child's brain  
growth is in the first  
three years of life.

**Help them be ready  
for kindergarten!**

## CELEBRATE YOUR CHILD'S MILESTONES AT EVERY WELL- CHILD VISIT

Pediatricians recommend all children be screened at every well-child visit between birth and age three, or any time there is a concern.

<p><b>Motor Skills</b> Hand-eye coordination makes mealtime fun.</p> 	 <p><b>Problem Solving</b> Learning to stack blocks can be a marker of success.</p>
<p><b>Social &amp; Emotional</b> Knowing how to play well with others is a reason to celebrate.</p> 	<p><b>Speech &amp; Language</b> Your baby learning to speak is cause for conversation.</p> 

## HOW DO I GET STARTED?

**Make an appointment with your child's pediatrician.**

Talk with your child's doctor and ask them about developmental screenings at your next appointment.

Contact CountyCare at **XXX-XXX-XXXX** for additional information. We'll help you schedule an appointment with your child's doctor.
